

WATER ~ MARK "TO THE SEA"

Reconnecting Nature with place, our Place.
Which oft lay in the shadow of modern life.

Many who live in our urban communities, small or large,
share these yearnings whether conscious or deep within.
We pass daily over the bones of the corpus that sustains us without
knowledge or recognition.

How do we address this in our urban environment, already cluttered
with oversized, overstated signage?

With symbolic language.

A symbol can be small, yet have a distinct and discreet clarity.

"Where does the Leechwell water go?"

This **WATER COURSE GLYPH** evokes the movement of water.

It is simple, easily read and adaptable to any urban surface,
Even under water itself.

If placed in the Leechwell stream denoting the line of flow,
it will evoke an awareness of connection from Place to the Water's
final destination, The Sea, only to return to us as Rain.

Can be mounted above the surface.....or below it.
